duck-billed
dinosaur
new genus
and species

McWane science center
A guy named Jun
Told us about The dinosaurs,
he got to name one!
All The dinosaurs in Alabama
are new. He found some
bones just laying on the ground
on the side of the road. He is one
of the only two
Paleontologists in
all of Alabama. The
newest dinosaur that
Jun found was duck-
billed! It was a new
genus & a new species.
He had a Thirteen
foot long turtle fossil
model. It was a really fun
field trip.
