

This is
a lot of
SLOSS & what

The se
are some
pipes,
The green
ridges
one is
water

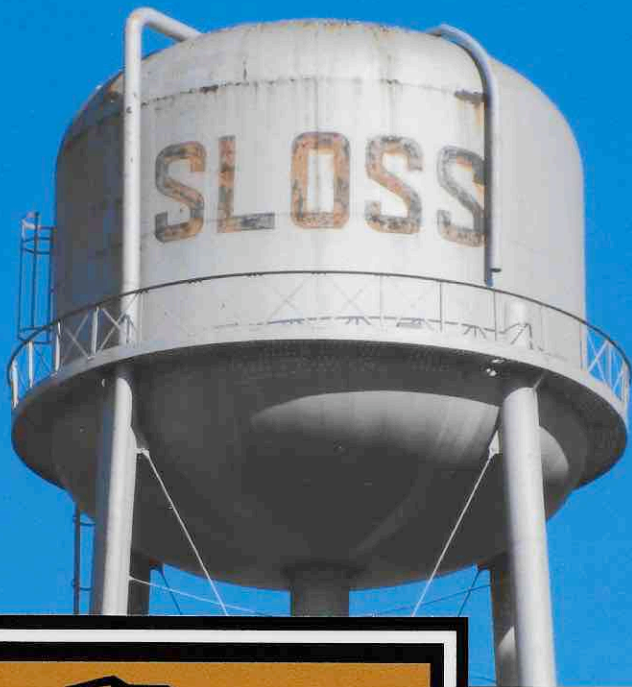

We went to Sloss Furnace with the Sparks! And a girl named Lydia who was going to put a story on Instagram.

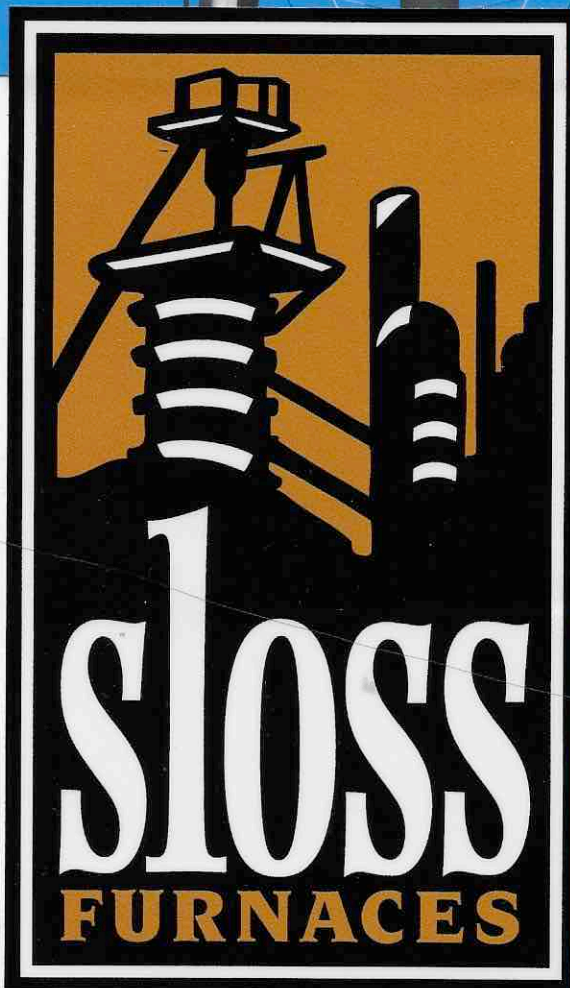

Birmingham is called the Magic City because iron was the magic, they had iron railroads, trains, ships, and tools.

But it was very dangerous, you could even go deaf because you weren't allowed to wear ear protection because you might not hear alarms and stuff. Some people even died just working there. After a while they closed because pig iron was getting out of fashion and the pig iron stores were all closing and plastic was cheaper and more popular. But overtime they got back going again and they started to collect old photographs and artifacts and then they reopened as a museum of industry!

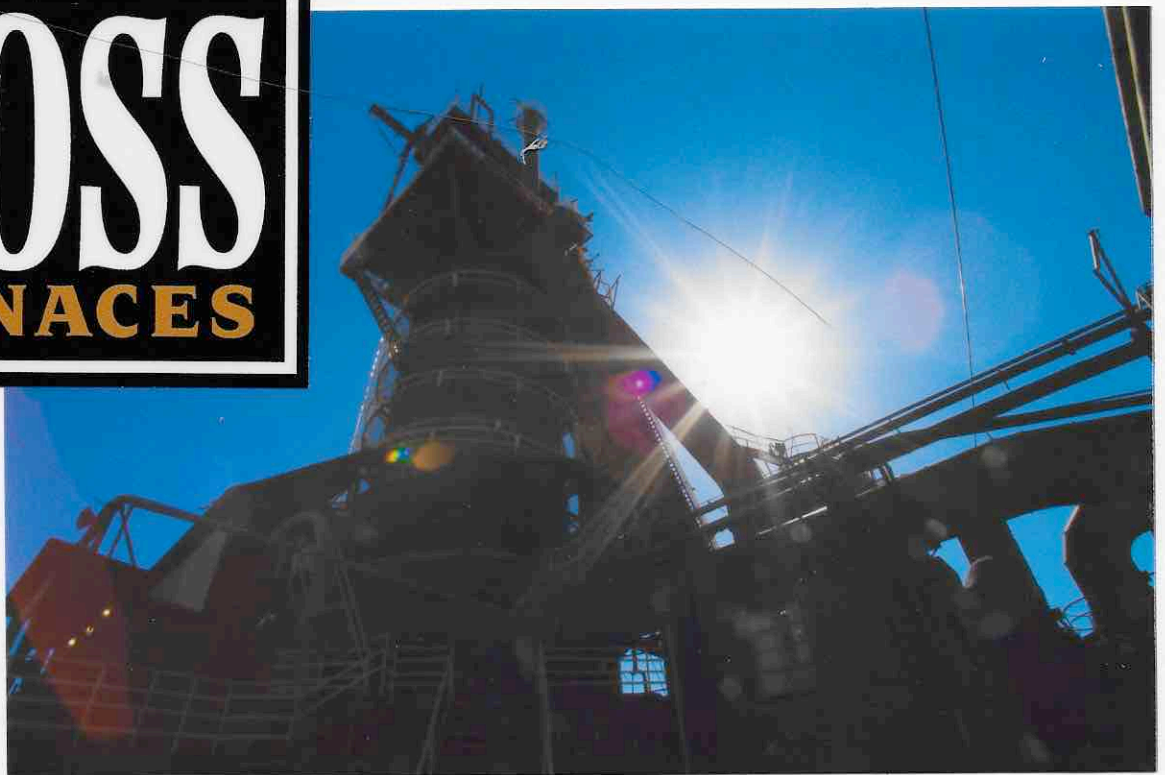

After we took a tour we scratched

This is the
tower. I think
That it looks
really cool!

This is a cool
sticker of
Sloss Furnace.

designs in sand blocks and
 Then they pour iron into it
and cool it and take it out
and if someone made this
design the iron would look like
this ————— Lakes was like this
in the  sand mold...

and this in the iron 
 (He actually tried
to write Lake and it
came out evil, we don't know how.)

— Ali
Gabbakab

This is us carving
into the sand
molds.

This is the
workers
pouring
iron into
the molds.
It looks
like lava
time!

These are
all of us
(kids)

This is
us having
a "kid
meeting"

This is the
iron making.
The stuff
dripping
down is "slag"
The rock
That comes
out ^{when}
you're mining
for iron.

These are
some of the
sand molds.

This is a
Giant Wrench
that they
would have to
use a small
crane to lift
because it
weighs 2,000
pounds!

This is
coke, a
kind of rock.
don't drink
it.
