

We went to DeSoto Caverns Family Fun Park with the Updikes and the Owens. We did mini golf, a corn maze, canon wars, Tubs of fun, Crystal find, go carts, and went in the caverns. (When I write cave and caverns, I mean the same thing.) In the cave, we watched a video and saw a light show then walked around a little.

Once a man came in the cave and carved his name and the year 1723 into a rock and took a nap because it was so cold outside, but it was burial grounds to some indians and so they just killed him. In another part of the cave they found bones from a 7 foot tall man with a protruding jaw. they researched him and found out his name was Chief Touch The Sky. His skeleton was on display until the 1990s when his descendants came and buried him and no one knows where he is.

There were rocks called imagination formations, like an eagle, Yoda, Jellyfish, a dog, a dragon, a dragon egg... There was a restaurant called The Cavern Tavern and for amusement and because the people were drunk, they shot off some Stalagmites, and so many people died from getting hit with a ricocheting bullet or a stalagmite that it was called The Bloody Bucket, and the police found out and arrested every one.

The trick to mazes, all mazes  
is never take your left  
hand off the wall and it works!  
It led us to all three Indian towers  
and out!

Congratulations! When you have  
stamped your card on all three Indian  
Village towers you have conquered
