

We went on the double Helix trail - it is shaped like DNA, and it had lots of information on DNA too. We did a scavenger hunt on it! It was 0.8 miles. Grandmamma was with us.

Next we went to Early works. It was a history fun museum. Right inside was a crafted tree made of wilted leaves, and it was about fifty stuffed called the story tree! First Grandmamma read us a story while Noah buried me in Stuffed dogs! It was a little stuffy, but cozy. Next

we went into the main part of the museum and played Store for a bit then went into the little kid area, which was actually pretty cool! Then we saw a fake river boat and a Helen Keller section and next we watched a twelve

minute movie about Alabama.  
We also went to the Huntsville  
Depot and played in the trains.  
One they were working on and  
one had levers and knobs  
that made train noises and  
one that looked like it carried  
cattle and one that had a small grill,  
a bed, 4 upstairs seats, a  water supply,  
a  tool shed, and a bathroom. After that we  
went to the Little Toots

Imagination Station.

Then we went to a Huge  
Garage with an old  
fire truck, a stuffed dalmation,  
an old wagon, a Model T truck,  
an old blue car, the front of an  
old big rig, and a trampoline on the  
wall. Then we went outside and saw  
a roundhouse and a turntable.

We had a lot of fun on our  
trip to Huntsville.
