

We went to the U.S. Space And Rocket Center with Grandmama, Pop, and Nick. First we went down a blueish tunnel and saw Neal Armstrong's Practice Suit!! Also we saw a prototype space suit! And I played with a little virtual reality Space Stuff.

Next we went

to a small playground

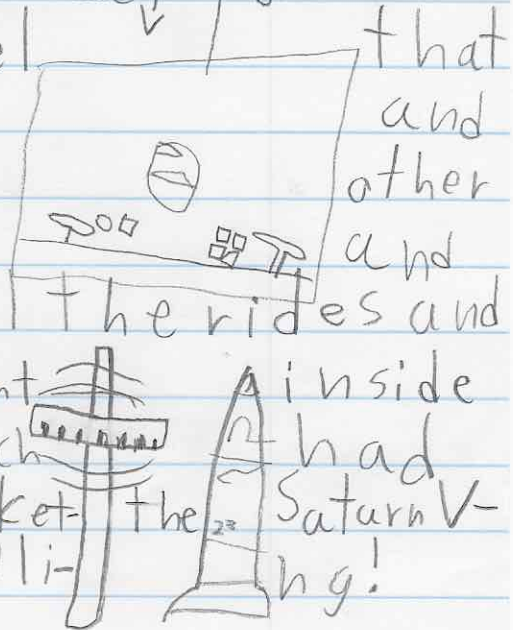

with a cool ride that takes you up and down, but I was too tall to do it.

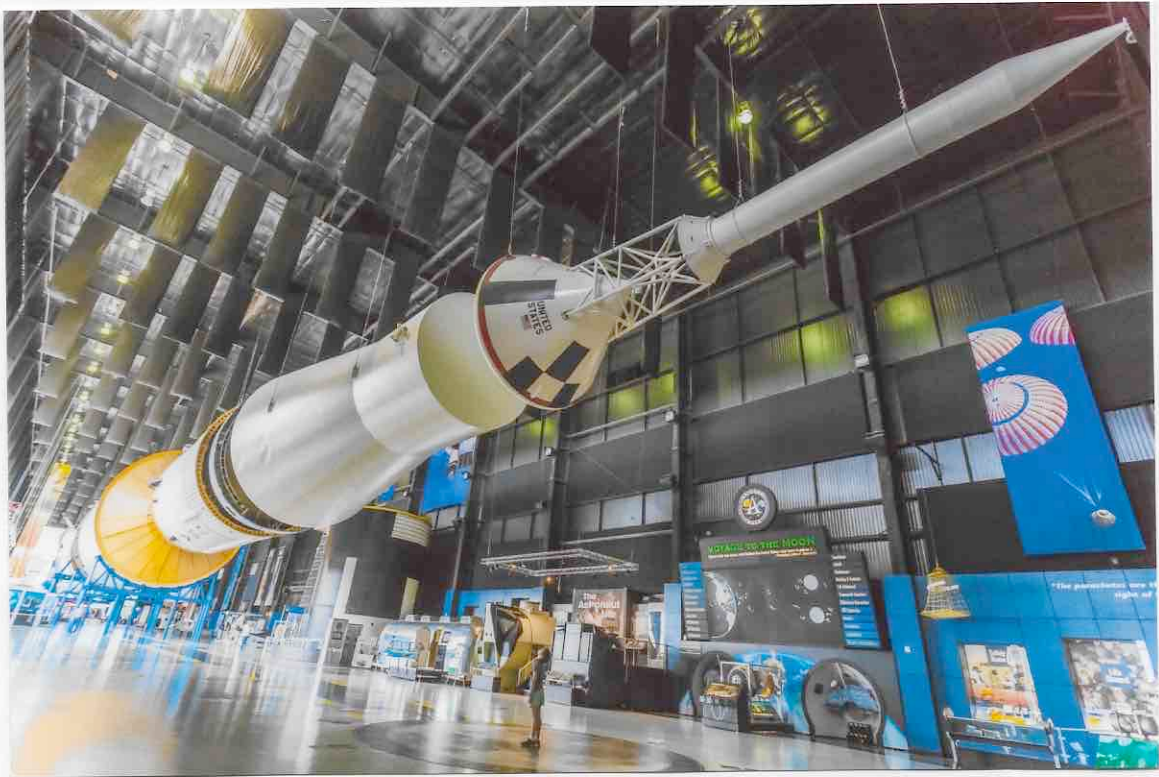

The playground was pretty cool, it had a little clubhouse place,

and a tunnel that span around a bunch of stuff.

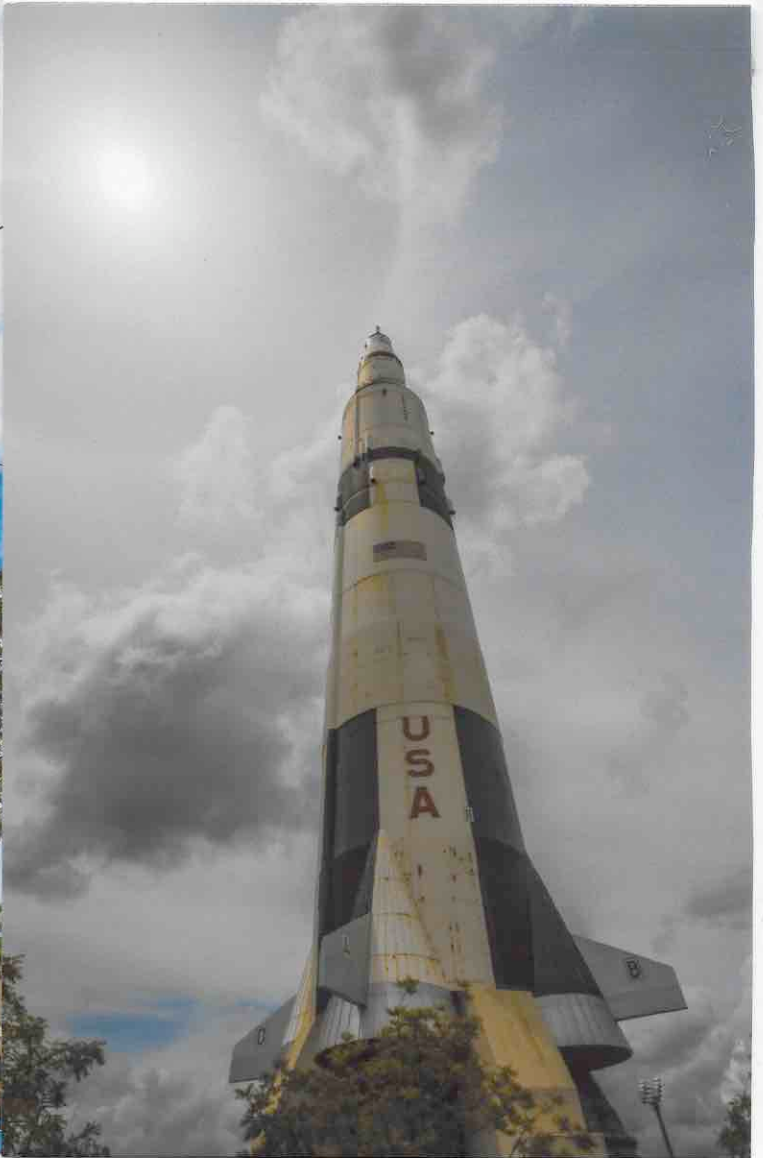

Then we went looked around at all the rides and rockets. We also went

to the next building which had a giant, **HUGE** rocket hanging from the ceiling! the Saturn V.
